11.50-12.00 Round up discussions, end of session

The OCE education committee was founded in April 2015 as a new branch on the OCE tree with the aim of providing a forum for European Orthoptic and Ophthalmic Educators to discuss relevant education issues. The forum will provide a unique opportunity to discuss and share good practice across ophthalmic education.

We invite all those attending the ESA-ISA Congress who are currently involved or interested in the education of orthoptic students, residents, medical students or other ophthalmic personnel to attend.

The forum will comprise of presentations from educational experts in the fields of orthoptics or ophthalmology with the opportunity for questions from the delegates.
